

Qualified HSA Expenses

What can I purchase with my HSA funds?

Health Savings Account funds can be used to pay for out of pocket medical expenses, such as your deductible, co-payments for medical care, prescription drugs, or vision and dental bills. To view the full list of qualified medical expenses, visit www.irs.gov and view IRS Publication 502. If you are unsure if something qualifies as an eligible expense, we recommend consulting with a licensed tax advisor.
