

Dental Cost Estimator

It's an easy way for members to find out what dental procedures cost in their area.

Now offering
an in-network
version

The Dental Cost Estimator has always shown members a range of out-of-network costs for dental procedures. Now, members also have access to an in-network Dental Cost Estimator, where they can compare up to three in-network providers side by side. Please note, both the in-network and out-of-network Dental Cost Estimators are located in the member's secure account (icons shown below).

In-Network Dental Cost Estimator

1. Access through Secure Member Account

Members can visit ameritas.com, Account Access, and sign in to their secure member account (or create one) for instant access to the Find a Dental Provider In-Network Dental Cost Estimator on the dental page. The system already will know the member's applicable dental network. Members can search for in-network providers and compare up to three.

2. Access through Find a Provider / Provider Search

Members can visit ameritas.com, Find a Provider, Dental, and search for providers, compare up to three, then select the Dental Cost Estimator link. This takes them to a Member ID Lookup page, where they will type in their existing secure account User ID, click Find Member ID, and be directed to their secure account portal to sign in. Members who do not have a secure account can select Create New Member ID to set one up.

Out-of-Network Dental Cost
Estimator

Out-of-Network Dental Cost Estimator

Also in the member's secure account, this tool shows a cost range reflecting the 50th to 80th usual and customary charges in an area. For both estimators, dental procedure codes and categories are updated annually to match the American Dental Association's Current Dental Terminology nomenclature.

The Dental Cost Estimators show estimates only. They do not indicate which services are covered under the member's plan or take into account plan allowances, coinsurance, deductibles or annual maximums.

For producers only
