

Customized Employee Benefits Website

A MGM Benefits Group Customized Client Website helps you by communicating benefits information to your employees consistently and with less effort. Managing and communicating employee benefits can be complicated and the costs involved are increasing dramatically.

We build a customized website for instant access to all employee benefit information. Your website is accessible 24 hours a day, 7 days a week and can be utilized by employees and spouses from home. The website creates a single access point for all of your benefits including medical, dental, disability, vision, life insurance, cancer, or any other benefits your company offers.

To assist your human resources department and to help employees, your website is comprised of a full set of documents including benefit plan coverage, enrollment information, plan descriptions, claim forms, customer service forms, links to provider directories, benefit handbooks and anything that your employees need regarding their employee benefits. Once your website is complete, we can also offer THEbenefitsHUB employee benefit enrollment system to enroll and manage benefit elections and transmit the data electronically to your payroll system and insurance providers.

We help you organize your employee benefit information and provide affordable technology your support staff will use on a daily basis. Give your employees instant access to all benefit offerings by utilizing a MGM customized employee benefits website solution!
