

Unemployment Claim Fraud

Protect employees from this potentially devastating crime.

With unemployment hitting record numbers, cybercriminals have found a new target: unemployment claim (UC) fraud. And while UC fraud impacts employers, it also has a significant, lasting impact on employees. Finding out that they are a victim of UC fraud can be stressful. Resolving the claim can be confusing and time-consuming. Plus, once their personal information has been compromised, continuing to monitor their identity and finances for additional threats can be overwhelming.

Aura™ Identity Guard® is here to help your employees.

- ▶ Resolve unemployment claim fraud.
- ▶ Provide identity and credit monitoring.
- ▶ Reduce the possibility of future fraud events.
- ▶ Provide ongoing protection from fraud to help achieve personal and financial goals, like buying or renting a home, paying for education, and saving for retirement.

Largest fraud attack on the U.S. ever. Period.¹

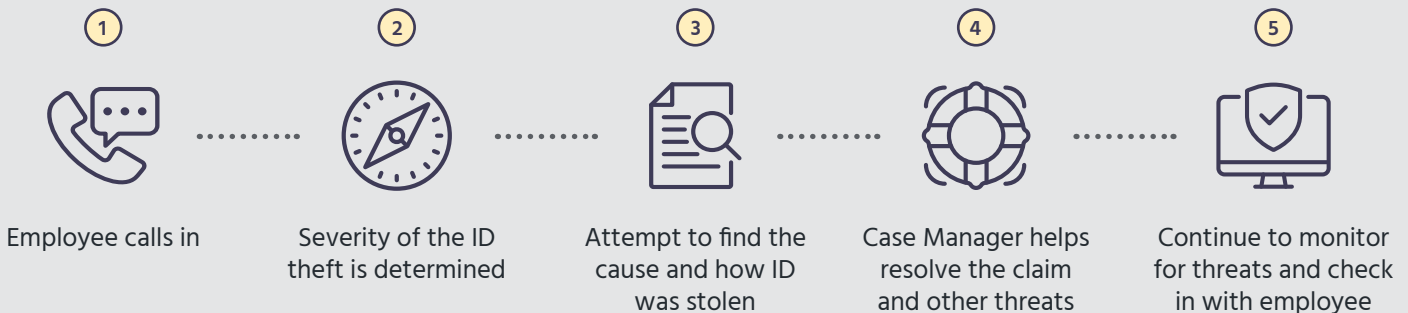

Over **\$89 billion** lost to unemployment fraud since the start of the pandemic¹

Record high unemployment applications ruled as fraudulent – some states reporting up to **75% of claims as fraud¹**

Employees will receive a **dedicated Case Manager** who will be their single point of contact and help them every step of the way.

Offer protection to your employees for free.

Contact us to find out how you can offer Aura Identity Guard to all benefits-eligible employees for free until the start of the next benefits plan year.
